Re: **ALL-TECH Environmental Services Limited**
Letter of Recommendation

To Whom It May Concern:

I write this letter of recommendation for ALL-TECH Environmental Services Limited with complete confidence. The Vitalité Health Network has repeatedly retained the professional services offered by this firm over many years and I have personally seen this firm's growth through these years both expertly and professionally. My latest contact with ALL-TECH is recent, elaborating two complex fit-up projects requiring the coordination of two distinct clinical services (Morgue and Oncology) on two different sites.

Over the past years, ALL-TECH has provided technical investigation and auditing on many VHN projects from concept design thru to completed construction on a variety of always complex province wide healthcare projects. In my opinion, ALL-TECH regularly demonstrates its ability to deliver good quality service to our organization. Consequently, this firm remains on our "go to" list when selecting environmental services firms for VHN's internal infrastructure projects.

I choose to note specifically that ALL-TECH has regularly shown a solid ability to understand VHN's needs and requirements and VHN is once again looking forward to using their force in successfully completing its current projects.

In my opinion, ALL-TECH provides a high level of professionalism and is sensitive to the unique nature of our organization. The firm's great care taken to understand VHN's dynamics and key issues needing to be resolved enables ALL-TECH to expedite the resolution of matters by making suggestions, offering creative options, and understanding VHN's priorities. ALL-TECH also has great communication skills and relates well to individuals from a wide variety of professional backgrounds.

I offer my above comments in this letter for ALL-TECH Environmental Services Limited without any hesitation as I am confident this firm would be a very valuable acquisition by any Project Team seeking a solid new member with the ability to offer such a high value professional service on any of its significant future projects.
