January 09, 2018.

I own & operate a mould and asbestos abatement company in Sydney, Nova Scotia. I was originally introduced to ALL-TECH by a mutual client about six years ago when I was managing an environmental cleaning company here in the area.

At the time, I was just taking our company into the abatement line of work. Although trained and certified, our crews lacked experience in the field.

Having said that, we relied heavily on the expertise of ALL-TECH out on the job site. They were thorough, professional and extremely patient with this new comer to the industry. If only I had a dollar for every mistake corrected, or every tip thrown our way on how to transform ourselves into a confident & competent abatement contractor, all done without asking anything in return.

When I started my own company, there was no doubt in my mind that I wanted to work with ALL-TECH.

It's been two years now, and the relationship between ALL-TECH & my company remains strong. Dwayne & Jocelyn here in the Sydney office remain a true pleasure to work with.

It is my belief that Ty-Dan Environmental is a better company by utilizing the services of ALL-TECH.

If you want to be successful and present yourself as being a professional to your clients, you must surround yourself by those who are true professionals. ALL-TECH never fails to deliver.

I strongly recommend their services to anyone.
